

OMAR ALAMALDEEN

Electrical & Electronics Engineer | Power Systems & Cable Infrastructure Specialist
alamaldeen_omar26@outlook.com | +971 54 197 6089 | linkedin.com/in/omar-alamaldeen | Dubai, UAE

PROFESSIONAL SUMMARY

Electrical & Electronics Engineering graduate with demonstrated experience in electrical panel maintenance, motor diagnostics, cable inspection, and power system troubleshooting. Proficient in AutoCAD and Revit MEP for electrical distribution design and BIM documentation, with hands-on project work spanning residential energy distribution, transformer sizing, and feeder design. Familiar with UAE and GCC electrical standards. Seeking to contribute technical expertise to power utilities, cable manufacturers, transformer companies, and electrical distribution organisations in the UAE.

CORE COMPETENCIES

Electrical Panel Inspection & Testing | Cable Sizing & Verification | Motor Fault Diagnosis | Load Calculations | Power Distribution Design | AutoCAD | Revit MEP | ETAP | PVSyst | DIALux | Safety & Compliance (UAE Standards) | Technical Documentation

WORK EXPERIENCE

Electrical Engineer

Apr 2024 – Oct 2024

Bader Motor Teknolojileri San. ve Tic. A.Ş. — Elazığ, Turkey

- Maintained and troubleshooted electrical panels for Hydrofor Pump Systems; diagnosed control circuit faults and coordinated repairs, achieving a 20% reduction in system downtime and enhanced reliability.
- Inspected and tested 50+ electrical panels for safety and regulatory compliance prior to deployment, reducing operational risk and ensuring workplace safety.
- Performed precision diagnostics on asynchronous motors, reducing fault-related downtime by 15% across multiple production lines.
- Documented and classified 100+ motors by system specifications, streamlining maintenance scheduling and improving asset management efficiency.

Technical Support Assistant

Jan 2024 – Mar 2026

Move to Excellence — Dubai, UAE

- Verified cable specifications and ensured compliance with UAE safety standards for newly installed electrical equipment, preventing installation hazards.
- Evaluated motor performance and energy consumption, identifying efficiency improvements that reduced power costs by 15% and extended equipment lifespan.
- Resolved controller faults and complex system malfunctions across 50+ electrical units, reducing operational downtime by 30%.
- Analysed technical documentation and manufacturer specifications to identify root causes and implement corrective actions, reducing repeat failures by 20%.

ELECTRICAL DESIGN PROJECTS

Residential Energy Distribution & Street Lighting Design | AutoCAD

- Developed complete electrical distribution layouts including transformer sizing, feeders, panel boards, and street lighting systems for a residential network.
- Performed load calculations and cable sizing to ensure system efficiency, redundancy, and compliance with electrical codes.
- Designed underground and overhead electrical routing with full documentation suitable for contractor handover.

Entire House Electrical Design — 1-Story Residential | Revit MEP / BIM

- Built a complete 3D BIM electrical model including distribution panels, branch circuits, and lighting layouts with full coordination across MEP systems.
- Developed panel schedules and one-line diagrams for system documentation and site use.

Personal Security Device with GPS Tracking & Alerts | Arduino / C — Graduation Project, Firat University

- Engineered a GPS-based security system with biometric fingerprint authentication, GSM-triggered SMS alerts, and automated alarm activation using Arduino Uno and C programming.

TECHNICAL SKILLS

Design & BIM: AutoCAD (Electrical), Revit MEP, DIALux

Power & Analysis: ETAP (Power Systems Analysis), PVSyst (Solar PV Simulation)

Programming: C (Embedded Systems), Arduino Uno

Standards & Compliance: UAE Electrical Regulations, IEC Standards, Safety Inspection Protocols

Soft Skills: Technical Documentation, Fault Analysis, Team Collaboration, Problem-Solving

EDUCATION

Bachelor's Degree — Electrical & Electronics Engineering

2018 – 2026

Firat University, Elazig, Turkey

CERTIFICATIONS

- Electric Power Systems — University at Buffalo
- Electrical Systems: Panel Boards, Feeders & Transformers — LinkedIn Learning (PMI® Authorised)
- Electrical Systems: Reading Drawings and Schematics — LinkedIn Learning (PMI® Authorised)
- Become a PLC Developer — Professional Learning Path — LinkedIn Learning
- The Complete Electrical Low Current Systems Distribution — Udemy
- Fire Detection & Fire Alarm Systems and Safety Signages — L&T EduTech / Coursera
