

OMAR ALAMALDEEN

Electrical & Electronics Engineer | Sustainability, Environmental Systems & Industrial Manufacturing
alamaldeen_omar26@outlook.com | +971 54 197 6089 | linkedin.com/in/omar-alamaldeen | Dubai, UAE

PROFESSIONAL SUMMARY

Electrical & Electronics Engineering graduate with practical experience in industrial equipment maintenance, energy efficiency optimisation, and safety compliance within manufacturing environments. Demonstrates strong capability in motor diagnostics, fault identification, and technical documentation — directly applicable to environmental systems, industrial manufacturing, and sustainability-driven operations. Experienced working in the UAE market with exposure to operational standards required by utilities and heavy industry sectors. Eager to support organisations in the Gulf pursuing efficient, safe, and sustainable production.

CORE COMPETENCIES

Industrial Equipment Maintenance | Motor Diagnostics & Fault Analysis | Energy Efficiency Optimisation | Safety Inspection & Compliance | Environmental Systems Support | AutoCAD | Revit MEP | ETAP | PVSyst | Technical Documentation | Asset Management

WORK EXPERIENCE

Electrical Engineer

Apr 2024 – Oct 2024

Bader Motor Teknolojileri San. ve Tic. A.Ş. — Elazığ, Turkey

- Maintained Hydrofor Pump System electrical panels in an active manufacturing facility, diagnosing control circuit faults and reducing system downtime by 20%.
- Inspected and tested 50+ electrical panels for safety and regulatory compliance, ensuring zero deployment failures and a safer production floor.
- Performed fault diagnosis on asynchronous motors with precision, reducing failure downtime by 15% across multiple production lines.
- Documented and classified 100+ motors by system requirements, establishing a structured asset register that improved maintenance planning and reduced scheduling conflicts.

Technical Support Assistant

Jan 2024 – Mar 2026

Move to Excellence — Dubai, UAE

- Assessed motor performance and power consumption across installed equipment, identifying optimisation opportunities that reduced energy costs by 15% — directly supporting sustainability targets.
- Maintained and troubleshooted 50+ electrical equipment units, ensuring continuous operations and reducing downtime by 30%.
- Verified cable compliance with UAE safety standards for all new installations, proactively preventing electrical hazards.
- Reduced repeat equipment failures by 20% through systematic analysis of manufacturer documentation and implementation of corrective maintenance procedures.

ELECTRICAL DESIGN PROJECTS

Administrative Building ELV Systems Design | AutoCAD

- Designed integrated ELV systems for a multi-story facility including Fire Alarm, CCTV, structured data networks, access control, and public address systems.
- Developed complete system schematics and cable routing plans with emphasis on fire safety compliance and full building coverage.
- Coordinated system integration between ELV subsystems, ensuring compatibility and adherence to safety standards.

Residential Energy Distribution & Street Lighting Design | AutoCAD

- Designed a complete residential electrical distribution network including transformers, feeders, panel boards, and street lighting infrastructure.
- Performed load calculations and cable sizing to ensure code compliance, efficiency, and long-term system reliability.

Personal Security Device with GPS Tracking & Alerts | Arduino / C — Graduation Project, Firat University

- Built a sensor-integrated embedded security system with biometric authentication, automated SMS GPS alerts, and Arduino Uno hardware control — demonstrating embedded systems and IoT-adjacent engineering skills.

TECHNICAL SKILLS

Design & BIM Tools: AutoCAD, Revit MEP, DIALux

Power & Simulation: ETAP (Power Systems Analysis), PVSyst (Solar PV)

Embedded Systems: Arduino Uno, C Programming, GSM/GPS Integration

Standards & Compliance: UAE Safety Regulations, IEC Standards, Industrial Inspection Protocols

Soft Skills: Technical Reporting, Root Cause Analysis, Cross-functional Collaboration

EDUCATION

Bachelor's Degree — Electrical & Electronics Engineering

2018 – 2026

Firat University, Elazig, Turkey

CERTIFICATIONS

- Fire Detection & Fire Alarm Systems and Safety Signages — L&T EduTech / Coursera
- Electric Power Systems — University at Buffalo
- Electrical Systems: Panel Boards, Feeders & Transformers — LinkedIn Learning (PMI® Authorised)
- Electrical Systems: Reading Drawings and Schematics — LinkedIn Learning (PMI® Authorised)
- The Complete Electrical Low Current Systems Distribution — Udemy
- Become a PLC Developer — Professional Learning Path — LinkedIn Learning
