

OMAR ALAMALDEEN

Electrical & Electronics Engineer | Electronics, ELV Systems & Technical Services Specialist
alamaldeen_omar26@outlook.com | +971 54 197 6089 | linkedin.com/in/omar-alamaldeen | Dubai, UAE

PROFESSIONAL SUMMARY

Electrical & Electronics Engineering graduate with practical experience in electronics troubleshooting, control system fault diagnosis, ELV systems design, and embedded hardware development. Able to troubleshoot and resolve technical issues across diverse electrical and electronic equipment, with a track record of reducing downtime and improving system reliability. Experienced in the UAE market delivering technical support to end-users and businesses. Well-suited to roles in electronics manufacturing, EV charging infrastructure, ELV systems integration, engineering services, and technical trading companies across the GCC.

CORE COMPETENCIES

Electronics Troubleshooting & Fault Diagnosis | ELV Systems Design (Fire Alarm, CCTV, Access Control, PA) | Control Systems & PLC | Embedded Systems (Arduino, C) | EV Charging Systems | AutoCAD | Revit MEP | Technical Customer Support | Cable Inspection & Compliance | Technical Documentation

WORK EXPERIENCE

Technical Support Assistant

Jan 2024 – Mar 2026

Move to Excellence — Dubai, UAE

- Provided end-to-end technical support for a range of electrical and electronic equipment, resolving controller faults, communication errors, and system malfunctions across 50+ units in the UAE market.
- Reduced operational downtime by 30% through structured fault analysis, rapid diagnosis, and implementation of corrective solutions aligned with manufacturer specifications.
- Analysed technical manuals and wiring schematics to identify root causes of recurring failures, reducing repeat faults by 20%.
- Verified cable specifications and ensured full compliance with UAE safety standards for all new equipment installations.
- Monitored motor performance and energy usage, recommending efficiency improvements that lowered power consumption by 15%.

Electrical Engineer

Apr 2024 – Oct 2024

Bader Motor Teknolojileri San. ve Tic. A.Ş. — Elazig, Turkey

- Diagnosed and repaired control circuit faults in electrical panels for Hydrofor Pump Systems, achieving a 20% reduction in downtime.
- Inspected and tested 50+ panels for safety compliance, ensuring reliable performance before field deployment.
- Applied precision motor diagnostics to minimise fault-related production stoppages by 15%.

KEY PROJECTS

Personal Security Device with GPS Tracking & Smart Alerts | Arduino Uno / C — Graduation Project, Firat University

- Designed and built a complete embedded IoT security system featuring biometric fingerprint authentication, real-time GPS location tracking, automated GSM-triggered SMS alerts, and audible alarm activation.
- Programmed full hardware-software integration using C, synchronising sensor inputs, GSM communication, and alarm outputs in real time.
- Demonstrated competency in embedded systems design, sensor integration, and IoT-adjacent product development.

Administrative Building ELV Systems Design | AutoCAD

- Designed a fully integrated ELV infrastructure for a multi-story commercial building including Fire Alarm, CCTV, structured cabling, access control, and PA systems.
- Produced complete system schematics, cable schedules, and routing plans following UAE fire safety and security standards.

Entire House Electrical Design — 1-Story Residential | Revit MEP / BIM

- Modelled a complete 3D BIM electrical layout including panels, branch circuits, and lighting, with panel schedules and one-line diagrams for contractor documentation.

TECHNICAL SKILLS

ELV & Electronics: Fire Alarm Systems, CCTV, Access Control, Public Address, Structured Cabling
Embedded & Control: Arduino Uno, C Programming, GSM/GPS Modules, PLC (Foundational)
Design & BIM Tools: AutoCAD, Revit MEP, DIALux
Power & Simulation: ETAP, PVSyst
Standards: UAE Electrical & Fire Safety Regulations, IEC Standards, Inspection Protocols
Soft Skills: Technical Support, Client Communication, Documentation, Problem-Solving

EDUCATION

Bachelor's Degree — Electrical & Electronics Engineering <i>Firat University, Elazig, Turkey</i>	2018 – 2026
--	-------------

CERTIFICATIONS

-
- The Complete Electrical Low Current Systems Distribution — Udemy
 - Fire Detection & Fire Alarm Systems and Safety Signages — L&T EduTech / Coursera
 - Become a PLC Developer — Professional Learning Path — LinkedIn Learning
 - Electrical Systems: Reading Drawings and Schematics — LinkedIn Learning (PMI® Authorised)
 - Electric Power Systems — University at Buffalo
 - Electrical Systems: Panel Boards, Feeders & Transformers — LinkedIn Learning (PMI® Authorised)
